

There are 310,433 young people aged 15 to 29 in the Basque Country, which represents 14.2% of the total population

In Euskadi the youth population experienced a continuous decline from 2010 to 2016, the year in which the lowest number of young people aged 15 to 29 was recorded (283,517). Subsequently, this number has been increasing and on January 1, 2022 Euskadi had 310,433 young people of that age.

The number of young men and women is very similar: 159,433 men and 151,000 women.

The young population has little weight in the overall population of the Basque Country, accounting for only 14.2% of the total population. In any case, this proportion has increased slightly with respect to previous years, as the percentage had remained below 14 % since 2013.

These data and their evolution, as well as their breakdown by sex or historical territories, can be consulted in the online statistics of the Basque Youth Observatory, in the "Demographics and Population" section.
