In the school year 2015/2016 more than a half of young people enrolled in High School (A levels) study entirely in Basque language

The Basque Youth Observatory has analyzed data on registrations for the 2015/2016 school year, in order to find out which is the educational model (according to the language) that young people and their families prefer when enrolling in High school (A levels).

In 2015/2016 school year, there are 30,168 young people studying in High school (A levels) in the Autonomous Community of the Basque Country (Euskadi). 61.3 % of them (18,491) are enrolled in D educational model (all studies in Basque language).

This percentage varies considerably by province. It reaches 73.9 % in Gipuzkoa, is considerably lower in Bizkaia (55.6 %) and achieves the lowest level in Álava (50.7 %).

These data come from statistics of non-university education system, published by the Department of Education, Language Policy and Culture of the Basque Government.

They are also available in EUSTAT (Basque Statistics Office), specifically in the Education section.
